Help – What are these number for?

Model – Type – Code

Model-type-code is a number that is stamped into every Briggs & Stratton engine. This set of numbers is required to identify spare parts and gather technical information for repair purposes..Eg; Valve Clearances and torque settings. The model-type number outlines engine features and the code provides a date the engine was built.

126L02-1015-F1 10031858

Model 126L02

Type 1015 - F1

Code 10031856

YYMMDDXX

DOM 04 14 2016

Some engines do not feature a "code" to show the production date. Instead they display DOM mm dd yyyy as above.

Serial Number

All engines now feature a serial number that is required to process warranty claims after repair. The serial number can be found on a barcode decal.

Power Code

Vanguard engines now feature a QR code/ serial number that can be scanned with a smartphone. This number is also required for processing warranty claims after repair. The QR code can be scanned to present engine parts lists, features and operators manuals on www.vanguardengines.com.
