

TECHNICAL BULLETIN No 49.96

30th April 1996

C800 20" CHEVRON TYRES

If 20" Chevron tyres are fitted to a C800 tractor it will be necessary to also fit a longer PTO belt as these tyres hit the sweeper body with the standard PTO belt (Gates SPZ1212). The PTO belt tension will then require resetting to 19mm (3/4") deflection at 2Kgs (4.5 Lbs) pressure. There is no requirement to change the belt back to the SPZ 1212 if or when grass tyres are re-fitted.

This belt should be sent with the tyres, but if it has been omitted or a replacement is required please order as follows:

Part No	Item
